

## Article 2 How to Prove Human Supremacy

To permanently eliminate the danger of AI encouraging the point of view of degrading humanity and our moral authority I believe we need to prove how humans, particularly our brains, are able to be creative, come up with new original ideas, and process the information the universe gives us.

Often the human brain is talked about as being like a computer. This is actually, I believe, completely wrong way to think about the brain and human cognition in general.
